

INSTRUCTION OF HELIUM BALLOON

1 After unpacking put the balloon on the ground.

2 Locate the sleeve to blow helium through that sleeve.

3 Connect the pipe with bottle with helium.

4 Put another end of pipe to the sleeve.

5 Slowly turn on the buttle with helium.

6 Pump balloon to moment when you can press the hand 5-10cm into balloon. Do NOT pump balloon to the maximum.

7 Tie a knot at the end of the sleeve and hide it in helium balloon under square material with velcro tapes.

8 Mount one end of the cords to the ground and second end of the cords to the ground.

9 If balloon have the banner mount it to the point where all cords of balloon are connected together.
